spec: Rear Lamp

Product Type

Rear lamp — exterior lighting & signalling module combining multiple light functions, lens, and retro-reflector in a single housing.

Vehicle Category

M1 — passenger car. UNECE lighting regulations referenced apply across M and N categories.

Function

- Rear position signalling (presence/visibility)
- Braking indication (stop lamp)
- Reversing illumination
- Passive conspicuity (retro-reflector)
- Light transmission & color definition (outer lens)

Main Parts

- Rear position lamp
- Stop lamp
- Reversing lamp
- Outer lens
- Retro-reflector

Materials

Representative values — confirm against actual bill of materials.

Component	Typical material(s)
Outer lens	PMMA (red-tinted, UV-stabilised)
Housing	PP or ASA/PC
Reflector surface	PC with aluminium vacuum-metallised coating
Retro-reflector	PMMA (molded prism optics)
Light source	LED modules on PCB
Seal / gasket	TPE or silicone
Fasteners / clips	PA, POM, or steel
